SYSTEM AND METHOD FOR MANAGING EVENT PUBLICATION AND SUBSCRIPTION

ABSTRACT OF THE DISCLOSURE

A system for publishing and subscribing in event systems is disclosed. The system comprises a logical event manager. A physical event manager communicates with the logical event manager and a first and a second event producer-consumer. The physical event manager includes a first mapper that translates between the logical event manager and the first event producerconsumer and a second mapper that translates between the logical event manager and the second event producerconsumer. A method for publishing and subscribing in event systems is disclosed. A logical event manager receives a logical event from an event producer. logical event is communicated from the logical event manager to a physical event manager. The physical event manager uses a first mapper to translate the logical event to a first signal, and a second mapper to translate the logical event to a second signal. The first and second signals are published to first and second event consumers.
